

Publish live

Android Mobile

Publishing live news on
the Android platform

Having established leadership with iPhone, iPad and Web-mobile applications, KnowledgeView now offers Android news apps with the same level of excellence and richness of features

With Android Mobile you can

- Publish your news content with single-click publishing
- Enjoy zero-effort publishing if you already own Publish live mobile technology
- Generate revenues from advertising and content use
- Display quality Arabic even on non-Arabic supported Android phones

Extend your reach by publishing live news on Android mobile

- Extend your reach to the vast market of all Android mobiles
- Enables enhanced user experience with rich-media content including video play
- Allows breaking news and news notifications

Android Mobile adds value to your customers by enabling them to

- View news offline: entire channels can be saved for reading while offline, and individual articles can be saved to favorites for offline reading, including newspaper editions
- Share stories on Facebook, Twitter and Email
- Navigate better benefiting from article tagging
- Personalize own channels
- Search for articles, photos and videos

“KnowledgeView demonstrated the ability to publish TV Playlists to mobile phones, but even that eye-opener wasn’t as impressive as the outstanding simplicity of the one-click publish system used to do it with.”
